# PRESIDENT ASKS SENATE TO REJECT BORAH PLAN FOR PARLEY OF NATIONS

His Efforts to "Be Helpful."

## **CHIDES SENATOR** ON IMPETUOSITY

## Says Administration **Has Matter Under** Consideration.

President Harding declared unequivo cally today his opposition to the adopion by Congress of the Borah amendment to the Navy bill for an international economic conference.

The President made his position clear in a letter to Senator Lodge, republican leader and chairman of the foreign relations committee, which was read to the Senate immediately after that body convened. It was transmitted in reply to an inquiry by Senator Lodge regarding the Borah

In his opinion, the President stated, the adoption of the Borah amendment would be undestrable because it would create a false impression abroad and

In his letter he proceeded to "spank" Senator Borah verbally because he had offered the amendment without first seeking information as to what the administration was attempting to do to help solve the economic troubles of the world.

If Congress is really desirous of facilitating the tasks of the government in dealing with the European situation, the first practical step would be to free the hands of the world war debt funding commission so that helpful negotiations may be undertaken, the President said.

The administration forces in the Senate today were confident that the Borah amendment would not be added to the Navy appropriation bill. The President's letter was considered to have added great strength to the opposition. The assertion is made that the Borah amendment would go out on a point of order that it was general legislation on an appropriation bill.

Senator Lodge later told the Senate that he could not state "explicitly" the nature of the administration negotiations for a conference, but was authorized to say they did not include cancellation of the allied debt.

On the face of things it is equivalent to saying that the executive branch of the government, which is charged with the confluct of foreign relations, is not fully alive to a world situation which is of deep concern to the United States. As a matter of fact, the European situation has been given most thorough and thoughtful consideration for many months. Without questioning the good faith of the proposal I am very sure it would have been more seemly, and that the action of the Congress could be taken much more intelligently, if proper inquiry could have been made at the State Department relative to the situation, in which we are trying

So far as the limitation of land armaments is concerned, there

seems to be at this time no more promising prospects of accom-plishment than when the conference was held in Washington a year ago. Here, again, I venture to warn the Senate against the suggestion to our own people, or a gesture of promise to the world, which canot be fulfilled until the nations directly concerned express their readiness to co-operate to such an end.

With respect to limitation of auxiliary types of naval craft, which are not limited by the present naval treaty, it is to be said that such an agreement is much to be desired, whenever practicable,

but we may reasonably postpone our further endeavors along that line until the agreements made at the Washington conference secure the final sanction of all governments concerned

WHITE HOUSE, Washington, December 27, 1922.

My Dear Senator Lodge: Replying to your inquiry relative to the proposed amendment

to call an economic conference to deal with conditions in the wartorn nations of Europe, I write to say that I know of no prohibition against such an expression on the part of the Congress, but I do frankly question the desirability of such an expression. I think it is undesirable because of the false impressions which may be conveyed thereby to Europe, and even more undesirable because of the wrong impression it conveys to our own people.

Curzon Says Oil Row Must Be Settled by Private Conversations.

By the Associated Press.

LAUSANNE, December 28.—The near east conference was faced with a serious crisis today, as the sharp and ir reconcilable conflict between the Eng ish and the Turks over the Mosul oil fields reached a decisive stage.

Lord Curzon's statement that "the turning point of the conference had come," and that England would decline to continue the Mosul controversy, was in direct conflict with Ismet Pasha's note, asserting that the Turkish people had decided "to employ to the last limit of its forces all means to obtain the return of Mosul to the motherland."

Between these two extremes there is a gulf which seems likely to be diffi-cut, if not impossible, for the confer-ence to bridge.

Great Uneasiness Manifes

Great uneasiness is manifest through crisis, which, with the unsettlement over the straits and the status of minorties, indicates that the conference is fast approaching a climax and that both sides are preparing for a final
